SUMMARY

Information Systems Engineering student with a genuine interest in software testing and quality assurance. I have hands-on experience writing and documenting tests for a web backend, a basic understanding of web technologies (HTML, CSS, JavaScript), and I enjoy finding edge cases and reporting them clearly. Looking for a QA internship where I can follow structured test plans, learn professional QA methodologies and tools, and contribute to reliable web applications.

SKILLS

Web technologies: HTML, CSS, JavaScript / TypeScript (basic)

Testing: Writing test cases, unit & module testing with Jest, documenting results, defect reporting

Programming: Python, JavaScript/TypeScript, SQL (basic)

Tools: Git & GitHub, Linux, VS Code, Docker (basic)

Strengths: Analytical thinking, attention to detail, clear written documentation

Currently learning: QA methodologies, Jira, and test automation basics (Selenium / Cypress / Playwright)

RELEVANT PROJECTS

Quality Assurance & Testing Project

2025

Universidad Nacional (UNA)

University project — NestJS, Prisma, Jest

- Wrote unit and module test cases for a web application backend, checking business logic and validating expected vs. actual results.
- Tested edge cases and invalid inputs to surface defects, and documented the outcomes as structured testing evidence.

Personal Web & Software Projects

2024–2025

github.com/SeguraStward

Self-directed practice — Python, JS/TS

- Built small applications (REST APIs, a spam-classification script, document-parsing tools) and manually tested them to confirm they behaved as expected.
- Used Git/GitHub to track changes and keep my work organized and reviewable.

EDUCATION

B.Sc. in Information Systems Engineering

In progress

Expected 2026–2027

Universidad Nacional (UNA), Costa Rica

- Relevant coursework: Software Engineering, Databases, Programming, Quality Assurance / Testing.

LANGUAGES

Spanish: Native

- **English:** Professional working proficiency (B2), written and spoken
