To the Esteemed Hiring Team

Operations Department — Align Technology

Belén, Costa Rica

Honourable Members of the Operations Department,

It is with sincere respect and earnest enthusiasm that I write to offer myself for the position of **Software Quality Assurance Intern**. Few prospects could please me more than the chance to learn the craft of quality assurance at your side, and to lend my hands, my attention, and my goodwill to the noble pursuit of building web applications that are dependable, useful, and a delight to those who rely upon them.

Though I come before you as a student still in the making, I do not come empty-handed. In my studies of Information Systems Engineering I have written and documented test cases for a web application, examined edge cases and invalid inputs in search of defects, and recorded my findings with care and clarity. What I may yet lack in years of experience, I shall gladly repay in diligence: I am eager to follow your test plans faithfully, to learn your methodologies and tools, and to prove myself genuinely useful in whatever task is set before me, however humble.

I would add, in all candour, that I am a quick and willing learner who adapts readily to new demands. I make thoughtful use of advanced artificial-intelligence tools to work more effectively and accurately — not as a substitute for understanding, but as an instrument to verify my reasoning, accelerate my learning, and deliver careful, well-documented results. It would be my privilege to place this same dedication in the service of your team.

I am deeply grateful for the time and consideration you have given to these few lines, and I would welcome, with the utmost gladness, the opportunity to contribute to the quality and craftsmanship of your applications. Should you find me worthy of a conversation, I remain ready and willing at your command.

With profound respect and gratitude,

Angel Stward Segura Mendez

Information Systems Engineering Student — Universidad Nacional (UNA), Costa Rica
