PROFESSIONAL SUMMARY

Systems Engineering student and aspiring **Machine Learning Engineer** with hands-on experience building Python AI applications, training classification models, and serving predictions through REST APIs. Strong foundations in mathematics, data structures, and neural-network theory, with a habit of shipping real projects. Seeking a remote/hybrid ML role to grow toward production-grade model development and MLOps.

TECHNICAL SKILLS

Languages: Python (primary), SQL, JavaScript/TypeScript, Bash
ML & Data: scikit-learn, pandas, NumPy, Matplotlib, feature engineering, model evaluation (precision/recall, F1, ROC-AUC)
Deep Learning: PyTorch / TensorFlow (fundamentals), CNNs, backpropagation, gradient descent, neural-network architecture
ML Serving & Apps: FastAPI, REST APIs, Firebase, Docker, model deployment, prompt engineering / LLM APIs
Practices: Git/GitHub, unit testing, clean code, Jupyter notebooks, data visualization
Currently strengthening: MLOps (MLflow, model registries), feature stores, vector databases / RAG, distributed training, AWS SageMaker

KEY PROJECTS

Spam Detection ML Service

2025

Personal project — Python, scikit-learn

github.com/SeguraStward

- Built an end-to-end text-classification pipeline (data cleaning, TF-IDF vectorization, training and evaluation) and served it behind a Python service for real-time inference.
- Compared multiple classifiers and tuned thresholds using precision/recall trade-offs to reduce false positives.

Andromeda API

2025

Personal project — FastAPI + Firebase

github.com/SeguraStward

- Built a Python REST API (FastAPI + Firebase) with validated endpoints suitable for serving model predictions, plus authentication and a maintainable architecture.

Deep-Learning Visualization Engine

2024–2025

Personal project — Python, Manim

Educational

- Authored animation scripts that visualize artificial neurons, CNN layers, loss functions, backpropagation, and gradient descent.
- Translated core deep-learning math into clear visual explanations, demonstrating strong conceptual command of neural networks.

EDUCATION

B.Sc. in Information Systems Engineering

In progress

Universidad Nacional (UNA), Costa Rica

Expected 2026–2027

- Relevant coursework: Data Structures & Algorithms, Databases, Software Engineering, Statistics, Discrete Mathematics.

LEARNING ROADMAP & TARGET CERTIFICATIONS

- **In progress / planned:** DeepLearning.AI — Machine Learning & Deep Learning Specializations; TensorFlow Developer Certificate; AWS Certified Machine Learning.
- Continuous practice on Kaggle competitions and open-source ML contributions.

LANGUAGES

Spanish: Native

- **English:** Professional working proficiency (B2)
