PROFESSIONAL SUMMARY

Systems Engineering student and aspiring **Backend / Data Engineer** who builds real, deployable services. Experienced with Python and TypeScript backends, REST API design, relational and NoSQL databases, and data-processing applications. Strong foundations in data structures, SQL, clean architecture, and a testing-first mindset. Seeking a remote/hybrid backend or data role to grow toward distributed systems and large-scale data pipelines.

TECHNICAL SKILLS

Backend: Python (FastAPI), Node.js / NestJS, REST API design, authentication, clean/layered architecture

Databases: SQL (PostgreSQL/MySQL), Prisma ORM, Firebase/NoSQL, schema design, query optimization (fundamentals)

Data: pandas, NumPy, ETL fundamentals, document parsing & structured data extraction

Quality: Jest unit/integration testing, test-driven practices, code review, professional documentation

DevOps & Tools: Docker, Docker Compose, Git/GitHub, Linux, Bash

Currently strengthening: Apache Spark, Airflow, Kafka, data warehousing (Snowflake/BigQuery), dbt, message queues, microservices at scale

KEY PROJECTS

Andromeda API

2025

Personal project — FastAPI + Firebase

github.com/SeguraStward

- Designed and built a production-style Python REST API with FastAPI and Firebase, with validated endpoints, authentication, and a maintainable, layered architecture.
- Containerized the service with Docker for consistent, cloud-ready deployment.

DocParser — Document Data Extraction

2025

Personal project — Python

github.com/SeguraStward

- Built a parsing pipeline that extracts structured data (e.g., invoices) from documents, transforming unstructured input into clean, usable records.
- Applied data-validation and normalization logic to ensure reliable downstream output.

Quality Assurance & Test Automation

2025

Academic project (UNA) — NestJS, Prisma, Jest

Costa Rica

- Engineered unit and module test suites for a NestJS + Prisma backend, validating business logic, data access, and edge cases.
- Delivered professional test evidence and documentation following structured QA standards.

EDUCATION

B.Sc. in Information Systems Engineering

In progress

Universidad Nacional (UNA), Costa Rica

Expected 2026–2027

- Relevant coursework: Data Structures & Algorithms, Databases, Software Engineering, Operating Systems, Statistics.

LEARNING ROADMAP & TARGET CERTIFICATIONS

- **In progress / planned:** AWS Certified Data Engineer / Solutions Architect Associate; Databricks / Apache Spark certification; PostgreSQL and data-modeling deep dives.
- Building personal data pipelines (ingestion → transformation → warehouse) for hands-on practice.

LANGUAGES

Spanish: Native

- **English:** Professional working proficiency (B2)
