PROFESSIONAL SUMMARY

Systems Engineering student and aspiring **Cloud / DevOps Engineer** who already builds, containerizes, and automates the deployment of real applications. Comfortable on Linux, with Docker-based environments, CI-style automation, and Infrastructure-as-Code fundamentals. Seeking a remote/hybrid platform role to grow into Kubernetes, cloud architecture, and SRE.

TECHNICAL SKILLS

Cloud (learning): AWS & GCP fundamentals (EC2, S3, IAM, Cloud Run), Firebase

Containers: Docker, Docker Compose, multi-stage builds, container-based dev environments

CI/CD & Automation: Bash scripting, build pipelines, GitHub Actions (fundamentals), Make/automation scripts

OS & Networking: Linux administration, shell, SSH, networking basics, system services

IaC & Config: Infrastructure-as-Code fundamentals (Terraform — learning), YAML, environment management

Languages & Tools: Python, Bash, JavaScript/TypeScript, Git/GitHub, SQL

Currently strengthening: Kubernetes (CKA path), Terraform, Prometheus/Grafana observability, AWS Solutions Architect, GitOps (ArgoCD)

KEY PROJECTS

Dockerized LaTeX Build Environment

2025

Personal project — Docker, Bash

github.com/SeguraStward

- Built a fully containerized build system (Dockerfile + Docker Compose) giving reproducible builds across machines with zero local dependencies, eliminating "works on my machine" issues.
- Wrote a Bash automation CLI (`compile.sh`) supporting build, clean, watch-and-rebuild, multi-engine selection, and project scaffolding.

Andromeda API

2025

Personal project — FastAPI, Firebase, Docker

github.com/SeguraStward

- Containerized a Python REST API and configured environment-based deployment for cloud-ready delivery.
- Designed a clean, maintainable service structure with separated configuration and secrets handling.

BotFlow — SaaS Platform (Architecture)

2025

Personal project — Backend / Infra

In development

- Defined deployment architecture, service boundaries, and scalability considerations for a multi-tenant SaaS chatbot platform.
- Applied infrastructure and pricing/operational-cost reasoning to design decisions.

EDUCATION

B.Sc. in Information Systems Engineering

In progress

Universidad Nacional (UNA), Costa Rica

Expected 2026–2027

- Relevant coursework: Operating Systems, Networks, Databases, Software Engineering, Algorithms.

LEARNING ROADMAP & TARGET CERTIFICATIONS

- **In progress / planned:** AWS Certified Cloud Practitioner → Solutions Architect Associate; Certified Kubernetes Administrator (CKA); HashiCorp Terraform Associate; Docker Certified Associate.
- Building home-lab CI/CD pipelines and Kubernetes clusters for hands-on practice.

LANGUAGES

Spanish: Native

- **English:** Professional working proficiency (B2)
